

WOODSIDE'S CONTRIBUTION TO THE AUSTRALIAN COMMUNITY

As the largest Australian natural gas producer, we are proud of the continued contribution we have made over the past 65 years to the communities in which we are active.

ECONOMIC

In the past five years Woodside has paid over **\$4.9 BILLION** in taxes and royalties to the Commonwealth and State Governments in Australia. In 2018 this figure was **\$894 MILLION**, including **\$204 MILLION** to Western Australia's state revenue.

As an operator, we spent **\$3.9 BILLION** on local content and services in 2018. Over **84%** of this was spent in Western Australia, supporting local jobs and businesses.

We directly employ over **3,500** people. More than **97%** of those are **based in Western Australia**.

In 2018, our Indigenous workforce increased by **11%**.

ENERGY SECURITY

In 2018, Woodside-operated facilities **supplied over ONE-THIRD** of the total gas consumed by Western Australian homes and businesses.¹

Our Burrup Hub vision will **deliver energy to Australia for decades to come**.

We also contributed over **\$3.7 MILLION** towards science and technology initiatives that are supporting our next wave of developments.

1. Woodside-owned share of total gas consumed in Western Australia was 7.3%.

All figures in AUD and current as of 31 December 2018 (Australian operations version).

COMMUNITY

In 2018, Woodside contributed more than **\$15.7 MILLION** to Australian communities through voluntary social investment programs that supported **education and early childhood development; environmental research; training and employment; science and technology; and culture and the arts.**

This included more than **11,000 HOURS** of Woodside employee volunteering time to communities around Australia.

We also leveraged **\$18.6 MILLION** in additional contributions² to Australian community organisations and activities.

ENVIRONMENT

In 2018, environmental spend was **\$5.2 MILLION**. This included programs and studies to understand the environments in which we operate, evaluate potential impacts and be informed to make the right decisions on environmental management.

Natural gas has a big role to play as the world demands more energy, with lower emissions. **Gas is clean, reliable, and the ideal partner for renewables.**

Woodside's Climate Change Policy defines its climate change approach in three ways:

Ensuring the
RESILIENCE
of our portfolio

Improving the carbon
PERFORMANCE
of our facilities and
developments

Defining the
FUTURE ROLE
of gas

In the past three years, **energy efficiency across Woodside operated assets improved by 3.4%**. We are committed to reaching **5%** by 2020.

2. Additional resources contributed to a community organisation or activity that come from joint ventures, employees, government funding partnerships and other co-funded initiatives Woodside is involved in.

All figures in AUD and current as of 31 December 2018 (Australian operations version).
